**DETAILED ACTION**

1. In view of the amendment of April 17, 2006, previous 102(e) rejection on claim 19 over Sakai'383 is hereby withdrawn.
2. In view of the terminal disclaimers filed, previous double patenting rejections over U.S. Pat.'707 and over U.S. Pat.'599 are hereby withdrawn.
3. In view of the amendment of April 17, 2006, previous 102(e) rejection on claim 25 over Kajita et al'316 is hereby withdrawn because the amended claim 25 now is entitled to the effective filing date of December 31, 1998. However, it is to be noted that in amending claim 25, applicants have broadened the scope of previous claim 25 from requiring two or more monomer units of an alicyclic olefin derivative to requiring no such monomer units. Therefore, any copolymer that comprises a repeating unit of present cross-linking monomer of the formula shown in claim 25 and another repeating unit made from other co-monomers would teach present invention of claim 25.
4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1752

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claim 25 is rejected under 35 U.S.C. 102(e) as being anticipated by Iwanaga et al (6,120,972).

In his Synthesis Example 1, Iwanaga teaches a copolymer which is a copolymerization product of t-butyl acrylate, 2,5-dimethyl-2,5-hexanediol diacrylate (which teaches a crosslinking monomer of present formula), p-isopropenylphenol and tricyclodecanyl acrylate. Therefore, Iwanaga teaches present invention of claim 25.

***Allowable Subject Matter***

7. Claims 1, 3-19 and 22-24 are allowed. Iwanaga does not teach or suggest present alicyclic olefin monomer units of claims 1, 4 and 5.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sin J. Lee whose telephone number is 571-272-1333. The examiner can normally be reached on Monday-Friday from 9:00 am EST to 5:30 pm EST.
